Clinisorb Non-Woven Sponges:
Our standard Non-Woven Sponges are an economical alternative to traditional woven gauze. These absorbent rayon/poly blend multi-purpose sponges are ideal for general cleaning and prepping. They also perform well when applying ointments.

New Sponges:
The New Sponge is an excellent example of DUKAL Quality. The effective combination of weight and open aperture allows each sponge to wick quicker and offer superior absorbency. They are made of a soft rayon/poly blend and are available in both sterile and non-sterile packaging.

Premium Sponges:
The DUKAL Premium Non-Woven Sponges are one of the thickest and softest on the market. This rayon/poly blend is more absorbent than our standard non-woven sponges. The heavier fabric offers quick wicking for maximum performance and a reduction in the number of sponges used. Ideal for delicate procedures and sensitive skin. These sponges are optimal for Dialysis, Esthetic Procedures, Plastic Surgery & Dermatology.

I.V. & T-Drain Sponges:
These rayon/poly blend sponges are pre-cut to offer a snug fit around catheters, tubes, I.V.s, and tracheotomies. These sponges offer a clean environment at the site that is soft and gentle against the skin, while the opening wicks moisture away from the site. T-Drain sponges are also available in Woven Gauze.
