How do the layers of the Eclypse® dressings work?

**The backing**
The water-resistant barrier backing on Eclypse® dressings are bacteria and viral proof and critically prevent strike-through.

**Secondary layer**
This layer sits underneath the backing and on top of the moisture locking layer.

**Moisture locking layer**
The central layer of the Eclypse® dressing consists of a sheet of highly absorbent crystals and a mechanically bonded cellulose pad.

**Rapid wicking layer**
This layer draws up the exudate from the wound bed delivering the exudate into the moisture lock layer.

**Soft silicone contact layer**
The silicone contact layer gently adheres to skin but due to the hydrophobic nature of silicone it will not adhere to the wound bed.

Manufactured in our state-of-the-art facility in the UK, our range of Eclypse® super absorbent dressings deliver quality performance in the controlled management of exudate. Our recent developments in the Eclypse® range of dressings have seen an increase in the absorbency of our products by 30%, with no impact on cost.

**Eclypse Adherent®**
Super absorbent dressing with soft silicone contact layer

Super absorbent dressing with a self adhesive soft silicone contact layer. The soft silicone layer provides gentle adherence and will facilitate atraumatic removal. Eclypse Adherent® is the only super absorbent dressing that features trauma-free silicone technology.

The silicone contact layer does not damage the surrounding skin, peri-wound area or newly formed tissue and will not adhere to the moist wound bed. Eclypse Adherent® can be easily lifted for adjustment without losing its adherent properties.

- Unique atraumatic wound contact layer combined with high absorbency
- Silicone adhesive enables single handed dressing application
- Minimizes trauma and pain upon dressing removal
- Market leading range of sizes

**Eclypse Adherent Sacral®**
Super absorbent sacral dressing

Super absorbent wound dressing featuring a soft silicone contact layer designed specifically for the sacral area.

The sacral area is a notoriously difficult area to dress with the combined requirements for absorbency, security and comfort.

The Eclypse Adherent Sacral® dressing has been specifically designed to meet these needs and is a major advancement in the management of sacral pressure ulcers.

- Unique atraumatic wound contact layer combined with high absorbency
- Anatomically designed shape
- Low profile round dressing edges prevent dressing lift
- Silicone adhesive enables single handed dressing application
- Available in two sizes
